"Light is defined as the form of radiant energy that our eyes are sensitive to and depend upon the sensation of vision."	Secondary	Leslie Stroebel, John Compton, Ira Current, Richard Zakia, <i>Basic photographic Materials and Processes</i> , USA, Focal Press, 2000
<p>"When you are taking a landscape photograph, try creating a sense of depth by keeping all the different elements of the image in focus.</p> <p>To do this you need to use a small aperture, from f/16-f/22 because this keeps objects in the foreground and background sharp. Place your camera on a tripod (this will eliminate camera shake) when using a small aperture, as less light will be entering the lens."</p>	Secondary	<p>Landscape Photography Tips Take Your Nature Photography to the Next Level! https://www.exposureguide.com/landscape-photography-tips/ Attila Kun, DATE OBTAINED- 3/12/18</p>
Respect the animals and environment- "We are photographing a sensitive world that is the home of many living things. We should make every effort to have a minimal lasting impact on that world"	Secondary	<p>12 Tips to Help You Improve Your Nature Photography https://expertphotography.com/nature-photography-tips/ - David Eldon, DATE OBTAINED- 3/12/18</p>
<p>Landscape Photography: Use a Wide-angle Lens</p> <p>"Landscape photography is a subject where you can use a wide range of lenses, from the wide-angles you probably think of first all the way up to telephotos. While the location and subject will always dictate the best focal length and technique to use, every landscape photographer certainly needs an ultra-wide-angle lens in their kit bag."</p>	Secondary	<p>Landscape Photography Tips - Attila Kun https://www.exposureguide.com/landscape-photography-tips/ DATE OBTAINED- 3/12/18</p>
